Dinner Lecture Topic: Preventive Care Diagnostics at Every Life Stage

Presenter: Daniel Baker, DVM, IDEXX Laboratories

This lecture has been approved for 1 CEU credit for Maine Veterinarians

This lecture provides evidence supporting preventive care diagnostics and the benefits preventive care initiatives offer to every veterinary practice.

Veterinarian Lectures

Lecture A: 7:00pm-8:00pm

Title: Therapeutic Options for Glomerulonephritis—Is it Possible?

Presenter: Mary Labato, DVM DACVIM (SA)

Lecture approved for 1 CEU credit for Maine veterinarians

Glomerular disease is a completely different kind of kidney disease—it is a disease of protein loss. This lecture will discuss glomerular physiology and the pathophysiology of glomerular disease, diagnosis and differentials including genetic predispositions and histopathologic diagnoses, treatment options and prognosis.

Lecture B: 8:00pm-9:00pm

Title: Small Animal Seizure Management

Presenter: Amanda Landry, DVM DACVIM (Neurology)

Lecture submitted for 1 CEU credit for Maine veterinarians

Join Dr. Landry for an in-depth overview of both short- and long-term seizure management practices in small animal medicine, covering the relevant physiology, pharmacology, and husbandry practices for animals presenting in historical or active seizure activity.

Veterinarian Technician and Assistant Lectures

Lecture C: 7:00pm-8:00pm

Presenter: Jennifer Uguccioni, CVT

Title: Anesthesia...Everything but the Kitchen Sink

This lecture discusses multiple short topics including anesthesia basics, anesthesia for different types of patients (geriatric, cardiac, c-sections, brachycephalic, and more), troubleshooting intraoperative complications, pain management, and capnography.

Lecture D: 8:00pm-9:00pm

Presenter: Mary Labato, DVM DACIM (SA)

Title: Fun Facts About Feline Hypertension

Join Dr. Labato and have fun learning all about feline hypertension, including determinants of blood pressure, definition of hypertension, the RAAS system, the causes, the tools to monitor hypertension (diet, drugs, co-morbidities), and... what's next!
