

Surgery

The PVESC surgical doctor team is comprised of multiple board-certified veterinary surgeons experienced in all areas of surgery (orthopedic, soft tissue, and neurosurgery), a board-certified veterinary neurologist, and a board-certified veterinary anesthesiologist. All anesthesia protocols are developed and overseen by our anesthesiologist. The surgical team works closely with our emergency and specialty teams, ensuring a continuum of care and availability of a wide array of advanced diagnostics and therapeutics, functioning seamlessly together for the best outcome for each patient.

PATIENT REFERRAL

The surgical service is available for scheduled consultation appointments and surgery Monday through Friday between the hours of 8:00am and 5:00pm. To reach our surgery department with questions on a specific case or on how to refer a case, please call 207-878-3121 option 2, or email surgery@pvesc.com. To schedule a consultation appointment, the referring veterinarian may call our office, or the client may call our office. Our veterinary referral form is available on our website, pvesc.com, in the “For Veterinarians” section. Please complete a referral form and include it with the patient’s records, and email to surgery@pvesc.com. For Neurology referrals, please see Neurology section.

SURGICAL EMERGENCY REFERRAL

If a surgical emergency case needs to be seen outside of our surgery department’s normal hours or 8:00am to 5:00pm Monday through Friday, please call our emergency department at 207-878-3121 before referring the patient to our office. Please ask to discuss the case with an emergency veterinarian, and together we can decide if a case should come in through our emergency department for emergency surgery, or if the patient can wait to be seen on our next scheduled surgery day.

SYNOVETIN OA

Synovetin OA® is a safe, effective, and long-lasting treatment for the pain and inflammation of canine osteoarthritis (OA). It is a single injection into the synovial joint, done here in our hospital, after which the patient can go home. For more information, please visit our website, pvesc.com.

To reach our surgery department, please call 207-878-3121 or
